Introduction

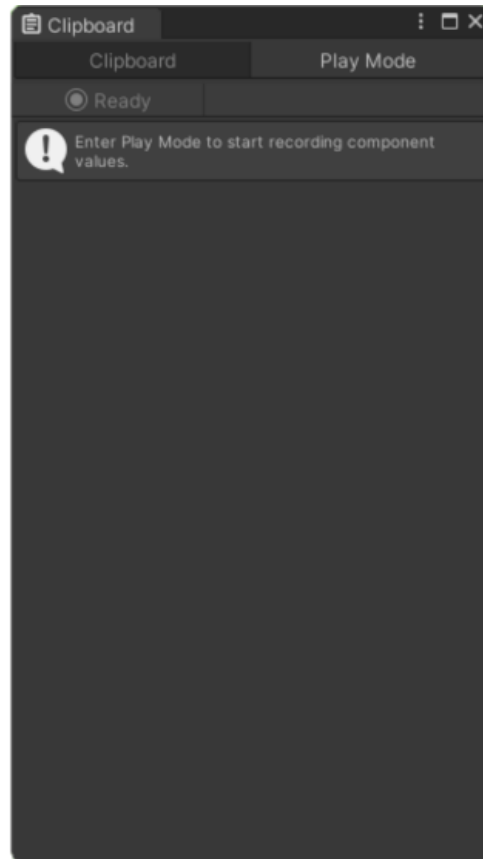

Clipboard Plus Ultimate is a Unity editor extension that enhances component management with advanced copying, pasting, and organization features. With favorites support, clipboard history, and value previews, it gives you precise control over how you handle component data between GameObjects.

Installation

- **Via Unity Asset Store:**
 - Get it from the [Unity Asset Store](#)

Getting Started

- **Opening Clipboard Plus**
 - Navigate through the Unity menu: Window → Clipboard Plus
 - Keyboard shortcut: Alt + W

Core Features

Play Mode Save

Auto Save

- Context Menu: Right-click any component → Clipboard Plus → Auto Save
| [View GIF](#)
- Drag & Drop: Drag components to the Clipboard Plus window → Auto Save
| [View GIF](#)

Save Snapshot

- Context Menu: Right-click any component → Clipboard Plus → Save Snapshot
| [View GIF](#)
- Drag & Drop: Drag components to the Clipboard Plus window → Save Snapshot
| [View GIF](#)

Component Management

Clipboard Plus offers multiple methods for copying and pasting components:

Copying Components

- Context Menu: Right-click any component → Clipboard Plus → Copy
| [View GIF](#)
- Drag & Drop: Drag components directly to the Clipboard Plus window
| [View GIF](#)
- Bulk Copy: Select a GameObject and press Alt + 2 to copy all components

Pasting Components

- Selective Paste: Right-click target component → Clipboard Plus → Paste
| [View GIF](#)
- Quick Paste: Right-click target component → Clipboard Plus → Quick Paste
| [View GIF](#)

Value Operations

Copying Values

- Expand a clip → Right-click a value → Copy
| [View GIF](#)

Pasting Values

- Right-click the target field → Paste
| [View GIF](#)
- Keyboard Shortcut: Select the target field → Ctrl + V

Utility Features

Search Functionality

- Filter clips by Component Name
- Filter clips by GameObject Name

- Combined search using both criteria
| [View GIF](#)

Favorites System

- Mark frequently used clips as favorites
- Filter view to show only favorite clips
| [View GIF](#)

Rename Clips

- Click on a clip's header to rename it

Sorting Clips

- Rearrange clips manually by holding the **ALT** key
- Sort clips by newest and oldest ones
